Endless frontier orc meta guide

The best and the worst will change when the game is updated, but this is the current position as it is for every race. The infinite depth of the border is not infinite, but it is certainly some alloys from what you expect out of a mobile game. This is a huge speed increase that will make your races go faster, which, in turn, makes you accumulate more fast medals. Unit skills are not really anything to write about and especially focus on health and defense. It runs to (and through the enemies, protectng by 99% of the two types of damage, and in the normal attack throwing additional teis treasure as well. The other brings enemies in an ice prison, keeping them stopped. Stealth is quite large, but even better is that the first blow she would receive from an enemy that detects Stealth is dodged. As Valkyrie, Steam Punk is competent as a number and support graces to its AOE grounded attacks. Consider the following: Admiral Dark has a minor attack range and no CC or multiple exclusive CC types (elves are immune to blowing attacks) Medusa does not have high survival of the dark admiral a team using the dark admiral A number must have sufficient cc to do for Gap Medusa debuff is often applied to various units at a time and it is strong - but it does not have pure cc, any jellyfish has more self-centered column skills Support stop points: 100 (Motion speed of varied units) 500 (Dead-living speed) 1100 (range of varied units attack) Incubusanged MagicalCoreOne can say incubus is the dead response to the sword dancer Of the elves due to their load attack and high survival, but it does not clean the floors so quickly as the sword dancer. In the last analysis, it boils down to the true attack of sylphid (able to attack aerial units) and DC. Your debuff is very good and is the biggest reasons use it as a support.Medusa can be competently used in orc-livead teams as it grants a 6% increase for attack speed and attack speed. attack. oht of fuck yralucitrap taht should fo habols ehtl dnaines woles (srepre (sreped teorid. Succubus can be used as a number in a pinch, but Lich and Incubus are much better options of undead magical number. Others may have their benefits (such as various unit skills benefiting all units of reach), but there is still no denying the alchemist's usefulness as a support of the elf team áE" and also© not a bad number.If you need a direct example of why this unit outperforms the other brackets of this type, look no further than its unit details.The Alchemist doesn't only have two forms of CC,© but one of them is unique and unlockable (although it doesn't affect large or flying units). The only downside to this unit is© that it doesn't attack. There's not much to say about the battle drummer. However, he is© a very competent number. This© is the exception to the CC rule, as Incubus has no real CC in its kit. I personally wouldn't recommend it as a prop.Support enhancement stop points: 200 (Undead movement speed) 500 (Movement speed of reach units) SuccubusRanged magicalSupportHere we are in the last unit of the list and it just by chance is© an ideal support. She is not very useful© against Valquaria + Priest teams.Sua isenerf isenerf ele ,ragul ues me sogimini sohcam arjAp 'As oEAn emrahc Friendly units to increase its speed of movement and attack speed - such as those of Medusa and Druid, to ignore the slow ones. As Succubus is a flying unit, it is not ^ to run as the Core of a team. But the dark form puts him at the forefront as a competent physical nucleus for a team of the undead. Should you choose Black Admiral or Medusa for your undead physical nucleus? because she has the opportunity to raise the Blessing of God and speed up the 5x game every 10 floors for 2 minutes (based on accumulation). She has some selfish unit abilities, with a unit at the level 1200, which increases her attack range, effectively facilitating her to gain her charm without dying. Succubus is suitable for most race teams, since most of her unit skills affect the units of discord, as opposed to the simple undead. There's no way around it. It doesn't easily make the best stealth unit in the game, but it does much more than steal. You can see the details of all the units of the game in the units comp, located inside the arrow in the upper right corner of the game's screen.(As a side note, I also translated the new skills of the Honor Units. Moreover, Sylphid is good for the elf-human teams, as it grants ^ speed of movement and attack speed to both races and has some unit abilities that affect the units of range rather than just the elves. Why not choose Sylphid instead of Hoyden Goki, another good Elf Physical Core? The first is linked to his general attack and A small blow, while the second is a charm that makes the enemy male units useless. Part of the work of a Nation is to act as a wall between the enemy and his crystal, and it simply cannot do that. But it needs support with Feasible to shine in the long term.Incubus does not have much direct in being a support, despite the 8% increase in game speed and 6% in the speed of movement and attack range of the undead, because many of its unitary capabilities are centered around it. This This you have a clear idea of the strengths of these units.As a side note, the "stop point" is© the level of improvement at which you must stop when using a unit as a support, so you don't spend medals on less important statist gains. Most up to© 1200 level are, in fact, just for your benefit. Are its tireless blow attacks and invincibly form of darkness that make it one of the best units, although it does not have the characteristic of single CC that many of the other units mentioned here tA^ m.Se not the form of darkening. Dark Admiral would be directly relegated to a point of support, because their unit skills are quite pleasant. But she has unit skills centered on distance units as well as the undead, so it's© really© up to you. It is an incredible support, granting an attack rate of 10% for the critical rate, 5% for movement speed and 5% for attack speed for all units áE" and this isn't even© touching the additional 10% medal gains it provides or its beautiful drive skills.An excellent unit for most teams without a dam.Support upgrade stop points: 300 (Attack speed of all units) 700 (Movement speed of all units) 900 (Range of attack of all units) 1700 (Movement speed of all units) Best Undead UnitsLichMagical rangeSupport or number of suitable to start with the Lich, because it is probably© the best of the undead units in general. Turning an enemy into a rabbit makes them completely helpless for a short period of time, and their normal attacks are fast enough to push the enemies relentlessly back.If your CC does not convince you, the increase to the attack range and speed of all units should seal the business. It's all about these processes of God's Plan.Point of Support enhancement: 300 (Movement Speed of all units) Best Elf UnitsSword DancerMelee MagicSupport or coreThis is© a unit that© is difficult to say goodbye once you have gotten used to it. Not only the damage to the base to the high©, it brings a stunning and a short-term beat to the table.It doesn't have the CC versatility that the Druid does, but the two are not sane competitors, considering that there are different types of damage. Each unit© is listed with an explanation detailing why it is currently in the top layer, what functions (support or number) it can function as, its general features and its "stopping point" to level as a support. The Wyvern Rider also©dodges, but it lies below the Nagu due to its lower statist, being a flying unit, and having only one form of CC.Naga©is also© decently suited to orc-undead teams thanks to the 4% increase in movement speed of both rations, Attack speed and attack range. I try to answer some of these questions in my team creation guide and unit priorities, but there's still a lot more ground to be covered than what was found there.This time, I want to tap into endless frontier's best current units, along with explanations about what makes them so good at commending with other options. That's© another plus. There really is no© downside to the Sword Dancer, but it loses out on reach unit skills that are a primary component of multi-ration teams. It grants movement speed, attack speed, and attack range to both rations passively, and it has some unit skills that benefit all range units (although most benefit only humans). 200 (human movement speed) 500 (human movement speed) 900 (human attack speed) 1200 (attack speed of range units) PriestMagical Support rangeThe Priest is not even© a very interesting or strong unit by itself, but is© the only party healer in the game and grants a specific function literally any player is happy to have.The biggest reason you see Priests on almost all high-level teams is not because© of your unit skills kit or A© jdaenU()daednU(003)daednu otnemivom ed edadicolev(001 :otnemaromirpa ed adarap ed sotonp etropuS.epiuqe reuqiauq a adniv-meb oEAsAda amu ©A euq .oxiab etnemavitalar oruo ed levAn mu me euqata ed ecnacla ed otnemua mu edecnoc m©Abmat eLe .atircec ad otnemom on adauqeda eroc eolem acin'Á a ©A aiE .aruc ed sedadicapac range) 500 (speed of movement of the undead) 1700 (speed of attack of the undead) Dark AdmiralYou are one of the most intimidating units visually in the game, but it is not so good. Nagu has two forms of CC in his toolkit, one of which is a slow (non-blocking) one connected to his standard attack. She may be invincible for a while, but Medusa has a unique debuff attached to her normal attack and an AoE ability. One can definitely argue that Medusa is not suitable for a support point because it has so many abilities of egoentric unity, one of which is not as high as the 1200 level. In general, there is a better unity with this in mind.Support improvement breakpoints: 200 (elf motion speed) 500 (range units motion speed) AlchemistRanged magicSupport or coreMake no mistake, Alchemist is the best elf support unit. This is yet another unique form of CC, which is extremely valuable in any unit.Ice Spirit's unity skills are oriented almost entirely to support, but that doesn't mean you can't use it as a Core. Its dual CC and stealth makes it a good support and core.Support improvement breakpoints: 100 (Orc speed of movement) 300 (Orc speed of movement) 1100 (Orc rate of attack chr) 1200 (All units of attack range) BattleNo attackSupportA pure support, the Battle is a welcome addition to almost any team, as all your unit skills are state increases for each race. When used in non-undead teams, think what's different here is that Steam Punk seems to be geared towards pure human teams or human elves.
